

BUILD & STORE PROGRAM

Save Now! Leverage 2026 Pricing for Your 2027 Projects

"Summer production lead times can stretch and deliveries can be delayed. Using the Build & Store Program guarantees that your orders will ship on time." - Vice President, Sales

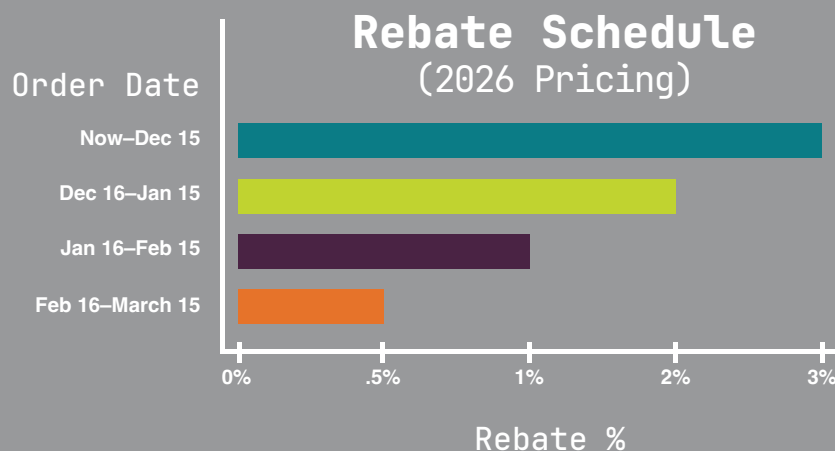

How It Works

- When we receive your complete and qualifying order starting August 1st, 2026 until March 15th, 2027 you will receive 2026 pricing.
- 2027 pricing will be effective September 2026.
- We store it at no charge and ship it on your designated date. This will guarantee you 2026 pricing.
- We do not issue an invoice until your actual ship date.

Benefits

- Orders that qualify for this program (\$20,000 net and up) will ship on time without delay. If you need to move your date back, we will hold* your completed order with no storage fee and ship when you need it.
- Create shorter lead times overall by softening the manufacturing cycle. This will also benefit your customers all year long.
- Increase manufacturing capacity during peak season by shifting qualifying orders to off-season.
- There will be less stress for you and more peace of mind for your customer.

Rebate Program**

We will send your invoice on the product ship date.

**In order to qualify to receive a rebate for any project the purchase order must be complete when submitted. Projects that are discounted beyond the standard discount are not eligible for Build & Store rebate.

***2027 pricing effective early September 2026.

Freight, fees and installation are not counted towards rebate.
