Meets or exceeds these ACT performance standards:

- **Fast Track**: Suitable for heavy duty applications including hospitality, healthcare, and education.
- **Grade 3**: Suitable for high traffic, general purpose environments.
- **Grade 4**: Suitable for medium to low traffic and general use.
- **Grade 5**: Suitable for low traffic applications.

Advanced Protective Topcoat

Advanced Protective Topcoat is a PFOA-free, stain-resistant high-performance topcoat intended for all environments, including extreme-condition installations such as hospitality, healthcare, and education. This topcoat provides easier maintenance for the coated upholstery.

Nanotechnology Stain Resistant Finish

A stain resistant finish that, thanks to the light-weight nature of nanotechnology, preserves a fabric’s feel. The finish also allows any bleach-treatable fabric to remain bleach cleanable. Ask your representative about our nanotechnology stain resistant finish providers.

Cleaning Codes

- **Bleach**: Treatable with a 4:1 or 10:1 water-to-bleach dilution for the lifetime of the product. WS Clean only with water-based or solvent-based cleaner. Do not saturate.
  - For regular maintenance of coated fabrics, always rinse the cleaned and/or disinfected area(s) with fresh water. Wipe dry and repeat if necessary.

Bleach and Disinfectant Testing

All products have been tested with bleach (sodium hypochlorite) and/or a variety of disinfectants (alcohol, hydrogen peroxide, quaternary ammonium). Scan the QR code below for specific test results.

Abrasion

Abrasion has been tested with the Wyzenbeek method using either cotton duck (CD) or wire screen (WS) as the abradant, or the Martindale method using worsted wool as the abradant. ACT guidelines require at least 30,000 Wyzenbeek double rubs or 40,000 Martindale cycles for woven upholtseries, or 50,000 Wyzenbeek double rubs for coated upholtseries in heavy duty single-shift application.

Multiple factors affect fabric durability and appearance retention, including end-user application and proper maintenance. Wyzenbeek results above 100,000 double rubs have not been shown to be an indicator of increased lifespan.

Quick Ship Program

Colors on this card are part of the Quick Ship Program. Orders up to 50 yards ship the next business day.
