

## General Specifications

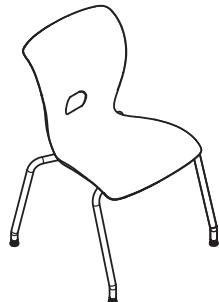

**Thermoplastic Shell:** Shells are formed thermoplastic, designed for comfort and flexibility. Glass reinforced plastic with a smooth texture makes it durable and easy to clean. The seat has a rolled design to reduce pressure on the bottom of your legs for comfort. Choose from different colors to match any environment.

**Post Leg Steel Base:** The chair/stool frame is constructed of .875" round 14-gauge steel tubing. Stool frames have a solid footrail, welded together around the frame. The frame is powder coated. Mobile units are fitted with twin-wheel locking casters suitable for multiple floor surfaces. Non-mobile units are fitted with a bell glide that is interchangeable with the caster. The Bell glide features removable/ swappable glide bases. Choose from: Nylon Base Glide; Steel Base Glide or Felt Base Glide.

**Cantilever Steel Base:** The chair frame is constructed of .875" round 11-gauge steel tubing reinforced around the curves of the base for strength. The frame is powder coated. Floor hardware consists of a heel and toe for extra stability with replaceable nylon glides on the bottom.

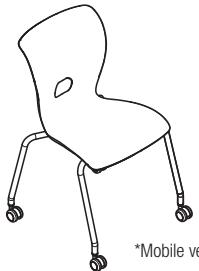

## Model Number Breakdown:

[SC4]-[16]-[NG]-[T12]-[809]

Shelby, 4-Leg Stacker, 16"H
